LDI GOAL: IMPROVING MATERNAL AND NEWBORN HEALTH OUTCOMES

LDI AIM

- Strengthening Leadership skills
- Increase adoption of maternal and newborn interventions
- Address the barriers
- Building a gender-transformative approach to champion women in leadership

LDI CLINICAL FOCUS

- India -

- ANAEMIA (IV Iron)
- EMOTIVE implementation for management of postpartum hemorrhage

LDI IMPLEMENTATION STRATEGY: INDIA

Pillar 1

**Enhanced
Leadership of
National Society**

Pillar 2

**Increased knowledge
and adoption of key
MNH Interventions**

Pillar 3

**Advocacy –
showcasing of
outputs/outcomes**

Pillar 4

**Monitoring,
Reporting and Audit**

LDI IMPLEMENTATION STRATEGY: INDIA

Pillar 1

- Tailored leadership workshops in each country - skills including, but not limited to, the areas of program, organizational management (financial, grants), advocacy, gender, youth, accountability, women-centered care
- Barriers Assessment Tool (BAT) Training - forms basis of identification of gaps, solutions to remedy, additional leadership skills to be adopted

Pillar 2

- Develop curriculum for the clinical focus area
- BAT conducted to get baseline
- Action plan developed
- Training of the Team
- Implementation of clinical intervention.
- Collect data at regular 6 month intervals
- BAT at the end of 6 months
- Implementation continues
- Updates incorporated
- Conduct webinars, trainings of fellow OBGYNs

Pillar 3

- Use information, data from pillar 2 to increase number of publications, speaking engagements
- Participation in FIGO, FOGSI - national/regional/local meetings, conferences showcasing individual, comparative outputs/outcomes
- Capacity building in communication strategy to increase evidence-based advocacy

Pillar 4

- Monitoring, Reporting and Audit

PROGRESS*

- 04 Implementation Sites Setup
- 50 Champions Identified, Oriented
- BAT round 1, 2 cycles Completed
- Clinical Focus Areas Firmed up
- Clinical Focus Areas Curriculum Designed, Developed, Implemented
- Data Training, Collection, Analysis
