Dear Presidents of the National Societies,

Hope this letter finds you well.

Some gynecologic cancers are associated with underlying somatic or germline genetic alterations. Today, genetic testing become an integral part in the management of gynecologic cancers. Asia-Oceania is a diverse continent with different cultures and distribution of resources. As the availability and structure of genetic testing can significantly impact the management of cancer patients and cancer prevention of carriers of pathogenic variants, the AOFOG would like to conduct a survey to understand the organization and structures of genetic testing services in Asia-pacific region, with an aim to narrow the gaps in future.

We sincerely invite you, along with your society members and colleagues, to take part in this survey. All healthcare professionals involved in the care of patients with gynecologic cancers welcome. The online questionnaire is straightforward and easy to complete, taking approximately 10–15 minutes. You can access it by scanning the QR code or visiting the following website: [https://hku.au1.qualtrics.com/jfe/form/SV\\_5tCm6uXGnaT8G8K](https://hku.au1.qualtrics.com/jfe/form/SV_5tCm6uXGnaT8G8K)

Your participation will contribute a lot to this project. To express our appreciation, the national societies of individuals who assist in completing our survey will be acknowledged in the manuscript. The final deadline of submission is 30 May 2026.

If you have any question, please feel free to contact Dr. KY Tse (email: [tseky@hku.hk](mailto:tseky@hku.hk)). Thank you very much for your support.

Yours sincerely,

Dr. Rohana Haththotuwa  
Secretary General-AOFOG
