FOGSI

DATE : 1/11/2018 | TIME : 9AM - 5PM
VENUE : Indraprastha, Apollo Hospital, Sarita Vihar,
New Delhi - 110076

THE COURSE CONSISTS OF 5 SESSIONS:

Session 1: Focus on background and rationale for a 'Training the Ultrasound Trainers' course in Obstetrics and Gynaecology. Understand the RCOG ultrasound curriculum and challenges in ultrasound training in the UK and India

Session 2: Discuss who can be an ultrasound trainer and how to teach ultrasound clinical and non-technical skills. This will be followed by learning about work-based assessments, trainee assessments, appraisals and mentoring

Session 3: Learn about giving feedback, managing performance and reflective learning as an ultrasound trainer

Session 4: Become familiar with resources for teaching ultrasound, e-learning platforms, simulation and blended ultrasound training. Understand the quality and standards required

Session 5: Learn how to set up a FOGSI recognised centre for ultrasound training and how to maintain the quality and standard of training. Understand the requirements for RCOG/FOGSI accreditation as a trainer. Hear about the local faculty-experience and receive tips on running a FOGSI recognised ultrasound training centre

WHO SHOULD ATTEND?

- If you are involved as a Director/Trainer in a FOGSI accredited ultrasound training centre.
- If you are an ultrasound trainer and plan to apply for FOGSI accreditation for your centre.
- If you are actively involved in ultrasound training and wish to attend to enhance your ultrasound teaching skills as a trainer.
- If you are interested in becoming a local faculty member and local ultrasound champion as a part of the RCOG-FOGSI collaboration for Training the Ultrasound trainers

Dear Colleague,

On behalf of the RCOG and FOGSI, we would like to invite you to attend the Training the Trainers Ultrasound workshop in New Delhi, on Thursday 1st November 2018.

This exciting new collaboration unifies standards and good practice of training in obstetric and gynaecological ultrasound across all FOGSI accredited ultrasound centres.

The theme of the workshop is 'Sharing and Caring for ultrasound training'

The current postgraduate system for obstetrics and gynaecology in India does not include ultrasound as a part of the curriculum. RCOG curriculum has incorporated ultrasound as part of the core curriculum. The aim of this workshop is to share this experience and use of RCOG resources and tools for assessment, feedback, evaluation and reflection as a part of ultrasound training.

As clinicians we are experts at clinical skills. But we are not trained to become trainers.

The workshop is based on 5 interactive sessions using different modalities of teaching and learning-lectures, videos, group discussions, interactive session with role plays for teaching ultrasound skills, assessment and feedback.
